

## BOOK REVIEWS BY WES DAUGHENBAUGH

January 17, 2016

**LIGHTS OUT**, by Ted Koppel is a must read.

Ted Koppel is the famous ABC news reporter who for years hosted NightLine. His book is about the imminent danger the United States faces from cyber attacks on our three power grids.

You'll learn why an attack is almost certain to happen.

You'll also learn that the Federal Government has NO PLAN in place to deal with such a crisis. The Electrical Industry has NO PLAN in place to deal with such a crisis.

Where does that leave you and me? Extremely vulnerable. A cyber attack would take six months to a year to recover from. Every family needs to store food and water and have the best survival plan in place you can possibly conceive of.

I'd recommend giving this book to people of influence—Mayors, Congressmen, Senators, Governors, Sheriffs, all your friends and relatives.

A COMPANION BOOK: Then buy and read ONE SECOND AFTER by William R. Forstchen. This is a novel about an EMP attack on the entire nation and what survival from that would look like. An EMP would be achieved by exploding a nuclear bomb high in the atmosphere above the United States. It would shut down every thing electric and virtually FRY it, making recovery take a year or more. In the meantime, it's been estimated that 90% of the nation would die if such a thing would happen. North Korea and/or Iran have the capability to do this by launching even an old Scud missile from a container ship off either coast. Russia and China could do this by launching missiles from submarines off our coasts.

A third book along this line is FAILURE OF IMAGINATION by Michael McCaul. I just bought it. Each chapter imagines some type of attack and what we could do to prevent or survive it. One of the chapters is about a cyber attack on the power grids.

On Feb. 22, 2015 God spoke to me and said, "I have ONE WORD for America: DISRUPTION. It's a better word than DESTRUCTION. Right now I could give America destruction but I'm going to give America more time to repent. But there will be disruptions in the energy and food supply and in many other areas. YOU ARE TO PREPARE PHYSICALLY. You are to use the times of disruption as joyful opportunities to win souls. DON'T GIVE ME DISRUPTION." Then three scriptures came rapid fire to me: Revelations 22:11, Hebrews 13:15 and 1 Thessalonians 5:16-18. Look them up and read them.

Spiritual preparation is most important because it can save your souls. But physical preparation could save your lives. The time to act is NOW. I believe disruption will

come in two major ways. #1 will be an economic credit freeze up where we won't be able to get money out of the banks or ATM machines and government checks won't be coming—with ensuing riots and social chaos. #2 An attack on the one to three of the power grids, with a cyber attack being the most likely.

I'm convinced very rough times are ahead. We all need to wake up and sense the danger. The prudent see danger and take refuge, but the simple keep going and pay the penalty," (Proverbs 22:3 and Proverbs 27:12) Perhaps it's repeated twice to make sure we understand how important it is to act prudently—see the danger, and do something before it hits.
